What should I know before investing?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks. **Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. **Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets. Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

Glossary

Ongoing Charges Figure (OCF): The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus. For recent all-in annual costs, as well as hypothetical performance scenarios that show the effects that different levels of return could have on an investment in the fund, where applicable, see the KID. **Comparator:** Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Cash Flow:** Supplements price/earnings ratio as a measure of relative value for a stock. For a portfolio, the value represents a weighted average of the stocks it holds. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Important Information

Effective 25 June 2025, the Templeton Euroland Fund was renamed Templeton European Insights Fund, updated its index to the Linked MSCI Europe Index-NR and modified its principal investment strategies.

This fund meets the requirements under Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR); the fund has binding commitments in its investment policy to promote environmental and/or social characteristics and any companies in which it invests should follow good governance practices.

Further information in relation to the sustainability-related aspects of the Fund can be found at www.franklintempleton.lu/SFDR. Please review all of the Fund's objectives and characteristics before investing. This material is intended to be of general interest only and should not be construed as investment advice. It does not constitute legal or tax advice and it is not an offer for shares or an invitation to apply for shares of the Luxembourg-domiciled SICAV Franklin Templeton Investment Funds (the "Fund" or "FTIF"). For the avoidance of doubt, if you make a decision to invest, you will be buying units/shares in the fund and will not be investing directly in the underlying assets of the fund.

Franklin Templeton ("FT") provides no guarantee or assurance that the Fund's investment objective will be attained. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. **Past performance does not predict future returns.** Currency fluctuations may cause the value of a Fund's investments to diminish or increase.
