What should I know before investing?

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities. **Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks. **Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. **Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets. **Multi-Manager risk:** the risk that independent decisions of Investment Co-Managers may conflict with one another thus resulting in loss of efficiency. Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

Glossary

Ongoing Charges Figure (OCF): The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus. For recent all-in annual costs, as well as hypothetical performance scenarios that show the effects that different levels of return could have on an investment in the fund, where applicable, see the KID. **Comparator:** Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Portfolio Data Information

Manager Allocation: Manager allocation includes managers that have been appointed as sub-advisors or managers of investment funds. K2 may determine in its sole discretion to not allocate to one or more of the managers and/or to add new managers. Accordingly, the manager allocation is presented for illustrative purposes only, and should not be viewed as predictive of the ongoing composition of the fund's portfolio, which may change at any time. Weightings as percent of invested capital into fund managers (sub-advisors or co-managers).

Strategy Allocation: Actual Allocation is a percentage of invested capital into fund managers (sub- advisors or co-managers) as of the end of the period. Target Allocations are as of the end of the period. The fund may shift allocations among strategies at any time. Further, K2 may determine in its sole discretion to not allocate to one or more of the strategies and/or to add new strategies. Accordingly the above target allocations are presented for illustrative purposes only, and should not be viewed as predictive of the ongoing composition of the fund's portfolio (and its managers), which may change at any time. Weightings as percentage of invested capital into fund managers (sub-advisors or co-managers).
